ILLINOIS CROP REPORT

FOR

May 1, 1911

SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE  
AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, May 1, 1911.

The information contained in this report was obtained from the reports of correspondents mailed to this department the first day of May.

The correspondents are, as a rule, representative farmers of extended experience who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

WINTER WHEAT.

Of the 1,323,356 acres seeded last fall for harvest in 1911, it is estimated that 88,048 acres, or a little less than 7 per cent, has been winter killed or destroyed by floods or Hessian fly, leaving 1,235,308 acres for harvest.

In northern Illinois the area destroyed was 5 per cent, and in central and southern Illinois 7 per cent.

The condition of the growing crop on May 1 is 94 per cent of normal, and 7 points better than the May 1 condition of 1910.

Hessian fly has injured wheat in Knox, Marshall, Peoria, Adams, Brown, Cass, Edgar, Fulton, Hancock, Logan, Macon, Mason, McDonough, Menard, Morgan, Moultrie, Sangamon, Schuyler, Shelby, Tazewell, Alexander, Clay, Clinton, Crawford, Effingham, Franklin, Gallatin, Jackson, Lawrence, Monroe, Perry and St. Clair counties.

Chinchbugs are reported from Franklin, Perry, Randolph and Washington counties and rust from Hamilton county.

SPRING WHEAT.

An increase of 8 per cent in the area seeded to spring wheat is reported this year, and the May 1 condition is 98 per cent of normal.

376183

## CROP REPORT.

## OLD WHEAT.

Of the 18,702,668 bushels of wheat raised in Illinois last year, it is estimated that there was on May 1, 1,972,607 bushels, or about 11 per cent, in the producer's hands.

Northern Illinois reports 11 per cent of the crop in first hands, central Illinois 8 per cent and southern Illinois 13 per cent.

The following table gives the amount of old wheat in first hands May 1, since and including 1880:

Year Produced	Crop in bushels.	Per cent crop on hand following May 1.	Amount crop in producers' hands following May 1.	Surplus wheat above seed and consumption at harvest.	Deficit at harvest.
1880	56,508,309	15	8,476,246	39,851,883	
1881	22,374,163	13	2,924,039	5,765,414	
1882	52,323,261	15	8,174,634	36,214,133	
1883	20,374,572	15	3,208,358	4,575,152	
1884	34,367,493	18	6,350,202	17,367,794	
1885	8,299,243	14	2,201,904		5,439,786
1886	28,284,068	15	4,000,931	12,082,999	
1887	38,076,468	13	5,034,875	21,842,119	
1888	33,916,920	12	4,022,569	17,334,947	
1889	37,201,916	15	5,722,594	20,919,433	
1890	13,608,504	12	1,580,903		2,002,400
1891	34,620,828	17	5,653,995	16,853,536	
1892	30,578,543	18	5,428,060	13,086,069

1908	19,508,260	4	876,875		1,622,852
1909	20,533,822	9	1,944,087		291,583
1910	18,702,068	11	1,972,607		2,280,835
Average.....	26,142,962	13	3,335,233	12,461,236	3,695,993

## WINTER RYE.

There were 49,311 acres reported seeded to rye last fall, and the May 1 report shows that 2 per cent of the area has been winter killed or destroyed by floods or Hessian fly, leaving 48,600 acres for harvest.

The May 1 condition is 99 per cent of normal in northern Illinois, 96 per cent in central Illinois and 98 per cent in the southern division, a State average of 98 per cent which is 5 points better than the condition a year ago.

## OATS.

The area devoted to oats is reported as 3 per cent less than last year.

The May 1 condition of this crop is 96 per cent of a seasonable average in northern Illinois, 93 per cent in central Illinois and 92 per cent in the southern division, a State average of 94 per cent.

## BARLEY.

There is a slight increase reported in the area of barley, and its May 1 condition is 97 per cent of normal.

## OLD CORN.

The Illinois corn crop of 1910, as reported to this Department, was 280,967,790 bushels. Of this amount about 31 per cent or 88,162,280 bushels was in the producers' hands on May 1.

Champaign county reported the largest corn crop in 1910, 11,216,150 bushels.

The following table gives the amount of old corn in the producers' hands May 1, the past thirty-two years, as well as the extent of the crop produced each year:

Year Produced.	Crop	Per cent corn on hand following May 1.	Bushels corn in producers' hands following May 1.
1879	305,913,277	32	99,229,889
1880	250,697,036	28	71,929,343

1909	265,940,893	29	77,458,339
1910	280,967,790	31	88,162,280
Average.....	234,758,935	30	71,054,022

## MEADOWS.

The area devoted to meadows is 96 per cent as compared with last year.

Their May 1 condition is 88 per cent of normal in northern Illinois, 94 per cent in central Illinois and 96 per cent in southern Illinois, a State average of 93 per cent.

The growth of meadows has been retarded to some extent owing to the cool weather previous to May 1.

## PASTURES.

There is a deficiency of 2 per cent in the area of pastures as compared with 1910.

Pastures are reported rather backward, making but slow growth on account of the cool weather. Their May 1 condition is 93 per cent of normal.

## SPRING PLOWING.

About two-thirds of the entire amount of spring work is usually completed by May 1, but, owing to the late spring, only half of the work is reported as finished on May 1.

The condition of the soil in northern Illinois is reported excellent. In central Illinois a number of counties report it packed and heavy, while in the southern division much rain is reported, and the soil hard to work.

## CROP REPORT.

### LIVE STOCK.

#### Horses.

The number of horses reported May 1 is 99 per cent as compared with 1910, and their May 1 condition is 98 per cent of normal.

Distemper is reported from Grundy, Kankakee, Kendall, Ogle, Will, Brown, Champaign, Greene, Logan, Mason, Menard, Pike, Sangamon, Alexander, Randolph, Union and Washington counties.

Pink-eye is reported from Logan county, and azoturia from Knox county.

#### Mules.

There is a deficiency of 3 per cent in the number of mules in the State this year as compared with 1910, and their May 1 condition is 99 per cent of normal.

#### Cattle.

The number of cattle reported this year is 95 per cent as compared with last year.

Their May 1 condition is reported as 99 per cent of normal in northern Illinois, and 98 per cent in the central and southern divisions of the State.

#### Dairy Cows.

The number of dairy cows is reported the same as last year, and their May 1 condition is 96 per cent of normal.

#### Hogs.

The number of hogs on hand May 1 is 99 per cent as compared with 1910, and their May 1 condition is 98 per cent of normal.

Hog cholera is reported from Knox, Brown, Edgar, Hancock, Morgan, Schuyler, and Wabash counties.

#### Sheep.

The number of sheep reported is 98 per cent as compared with last year, and their May 1 condition is 98 per cent of normal.

### FRUIT.

The fruit prospect on May 1 was most favorable, but very little damage from frost being reported.

### BEEES.

Bees are reported from a number of counties as having come through the winter in bad shape, and many colonies have perished.

## WAGES PAID FARM HANDS.

There is a steady increase in the wages paid to farm hands, but the supply of help is reported not equal to the demand.

The average wages paid farm hands for the past thirty-two years is given in the following table:

Division	Per Day		Per Month	
	With board	Without board	With board	Without board
Northern .....	\$1.10	\$1.40	\$21.65	\$29.60
Central .....	.90	1.20	19.25	25.75
Southern .....	.70	.95	15.80	21.95
Average .....	\$0.90	\$1.20	\$18.90	\$25.75

## CROP REPORT

The wages paid farm help in the three divisions of the State, during the past thirty-two years, are given in the following tables:

## NORTHERN DIVISION.

Year	Per Day		Per Month	
	With board	Without board	With board	Without board
1880	\$0.95	\$1.15	\$17.55	\$25.25

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not intended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years will be found to closely approximate the assessors' returns.

J. K. DICKIRSON, Secretary.

# ILLINOIS CROP REPORT

FOR

JUNE 20, 1911

---

## SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

Illinois State Board of Agriculture  
Springfield, June 20, 1911.

The information contained in this report was obtained from the reports of correspondents mailed to this office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### CORN.

A decrease of 4 per cent is noted in the area devoted to corn, as compared with 1910.

The June 20 condition of corn is reported as 88 per cent of normal, being 102 per cent in northern Illinois, 88 per cent in central Illinois and 75 per cent in southern Illinois.

The earliest appearance of corn above ground was April 1, which date was reported from Washington county, but most of it appeared during the first ten days of May.

The quality of seed corn is 99 per cent of an average, being 102 per cent in northern Illinois, 98 per cent in central Illinois and 97 per cent in southern Illinois.

Cat and wire worms and the root louse have injured corn in many counties and chinch bugs are reported from the southern division of the State as quite numerous.

### BROOM CORN.

The area of broom corn is 83 per cent, as compared with 1910 and the June 20 condition is 87 per cent of normal.

## CROP REPORT

## SORGHUM.

There is a decrease of 9 per cent in the area of sorghum this year.

In northern Illinois its June 20 condition was 94 per cent of normal, in central Illinois 81 per cent, and in southern Illinois 75 per cent, a State average of 83 per cent.

## WINTER WHEAT.

The June 20 condition of winter wheat in northern Illinois was 87 per cent of normal, in central Illinois 82 per cent, and in southern Illinois 88 per cent, a State average of 86 per cent, which is a decrease of 8 points since the May 1 report.

Hessian fly is reported from Boone, Iroquois, Knox, Marshall, Peoria, Putnam, Brown, Cass, Coles, Douglas, Edgar, Fulton, Hancock, Logan, Macon, Massac, McDonough, Menard, Morgan, Moultrie, Piatt, Pike, Sangamon, Schuyler, Shelby, Tazewell, Alexander and Saline counties. Chinchbugs are reported from Christian, Cumberland, Macoupin, Shelby, Bond, Clay, Clinton, Effingham, Fayette, Franklin, Jasper, Jefferson, Marion, Monroe, Perry, Randolph, St. Clair and Washington counties.

Rust is reported from Adams county and smut from Wabash county.

## SPRING WHEAT.

There is an increase of 10 per cent in the area of this crop in northern Illinois, where practically all the spring wheat is raised, and the June 20 condition is reported as 88 per cent of normal.

## OATS.

The unseasonable hot weather of May and June, together with lack of moisture during these two months, have caused this crop to deteriorate from 94 per cent of an average on May 1, to 61 per cent on June 20th. Many fields are reported too short to be cut with the binder.

Smut is reported from Henry and JoDaviess counties.

## RYE

The June 20 condition of rye is reported as 90 per cent in northern Illinois, 86 per cent in central Illinois and 85 per cent in southern Illinois, a State average of 87 per cent.

## BARLEY.

The June 20 condition of barley in northern Illinois, where most all of this crop is grown, is 90 per cent of normal.

## MEADOWS.

There is a decrease of 4 per cent in the area of meadows as compared with 1910. Meadows have been badly injured by drought, their June 20 condition being 63 per cent of normal in northern Illinois, 53 per cent in central Illinois and 48 per cent in southern Illinois, a State average of 55 per cent.

## CLOVER.

There is a decrease of 21 per cent in the area devoted to clover, as compared with 1910, much clover being reported winter-killed.

In northern and central Illinois the June 20 condition is 67 per cent of normal, and in southern Illinois 66 per cent.

## ALFALFA.

The June 20 condition of alfalfa is reported from forty-five counties in the State and is 84 per cent of a seasonable average, being 86 per cent in northern Illinois, 90 per cent in central Illinois and 76 per cent in the southern division of the State.

## HUNGARIAN AND MILLET.

In northern Illinois the area of Hungarian and millet is 103 per cent as compared with 1910, in central Illinois 82 per cent and in southern Illinois 86 per cent.

## PASTURES.

There is a decrease of 3 per cent in the area of pastures as compared with last year.

In northern Illinois their June 20 condition is 75 per cent of normal, in central Illinois 57 per cent and in southern Illinois 56 per cent, a State average of 62 per cent.

The protracted drought cut short the growth of grass, pastures having deteriorated 31 points since the May 1 report.

## IRISH POTATOES.

There is a deficiency of 7 per cent in the area devoted to Irish potatoes, as compared with 1910.

The June 20 condition of this crop is but 57 per cent of a seasonable average, being 80 per cent in northern Illinois, 49 per cent in central Illinois and 42 per cent in the southern division of the State.

## SWEET POTATOES.

There is a decrease of 11 per cent in the area devoted to sweet potatoes this year. Their June 20 condition is 73 per cent of normal, being 78 per cent in both northern and central Illinois and 64 per cent in the southern division of the State.

## FIELD BEANS.

A decrease of 10 per cent is reported in the area of field beans, as compared with last year, and their June 20 condition is 83 per cent of normal.

## COW PEAS.

The area of cow peas, as compared with 1910, is 110 per cent in northern Illinois, 84 per cent in central Illinois and 87 per cent in southern Illinois.

## TOBACCO.

No report was received on this crop from the northern division of the State. In central Illinois the area is reported the same as last year and the condition 80 per cent of normal. In the southern division the area is reported 65 per cent as compared with 1910, and the June 20 condition as 77 per cent of normal.

## FRUIT.

The outlook for a good crop of fruit is not as favorable as anticipated, the heat and drought prevailing during May and June cutting the yield short. Apples and peaches are reported as falling from the trees in a number of counties.

## CHERRIES.

Northern Illinois reports the yield of cherries 103 per cent, central Illinois 99 per cent and the southern division of the State 81 per cent.

## STRAWBERRIES.

The yield of strawberries was 81 per cent of a seasonable average in northern Illinois, 62 per cent in central Illinois and 70 per cent in the southern division of the State.

## RASPBERRIES.

Northern Illinois reports the yield of raspberries 91 per cent of a seasonable average, central Illinois 64 per cent and southern Illinois 74 per cent.

## GOOSEBERRIES.

Northern Illinois reports the yield of gooseberries as 90 per cent of a seasonable average, central Illinois 80 per cent and southern Illinois 86 per cent.

## CROP REPORT

## CURRANTS.

The yield of currants is reported as 89 per cent in northern Illinois, 82 per cent in central Illinois and 81 per cent in the southern division of the State.

## VINEYARDS.

The area of vineyards is reported as 98 per cent, as compared with 1910.

Their June condition is 98 per cent of normal in northern Illinois, 95 per cent in central Illinois and 91 per cent in the southern division of the State.

## YOUNG LIVE STOCK.

## PIGS.

The number of pigs reported this year, as compared with 1910, is 97 per cent and their June 20 condition is 97 per cent of normal.

## LAMBS.

The number of lambs reported this year is 96 per cent, as compared with 1910.

Their June 20 condition is 99 per cent of normal in northern Illinois and 96 per cent in the central and southern divisions of the State.

## CALVES.

The number of calves reported this year is 96 per cent, as compared with 1910, and their June 20 condition is 97 per cent of normal.

## COLTS.

The number of colts foaled this year, as compared with 1910, is 98 per cent, and their June 20 condition is 98 per cent of normal.

The average value of colts at weaning time is reported as \$55 in northern Illinois, \$62 in central Illinois and \$57 in the southern division of the State.

The number of colts lost prior to weaning is reported as 10 per cent in northern Illinois, 11 per cent in central Illinois and 8 per cent in the southern division of the State.

The average cost of service of stallions in northern Illinois is reported as \$15, in central Illinois \$13, and in southern Illinois \$11.

## WOOL.

The wool clip of 1911 was 4 per cent less than in 1910. In both northern and central Illinois it was 98 per cent, as compared with last year, and 92 per cent in the southern division of the State.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years will be found to closely approximate the assessors' returns.

J. K. DICKIRSON,  
Secretary.

# ILLINOIS CROP REPORT

FOR

AUGUST 1, 1911.

---

## SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

Illinois State Board of Agriculture  
Springfield, August 1, 1911.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-one years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WHEAT.

The area seeded to wheat for the crop of 1911 was 1,405,372 acres, all of which was winter wheat, with the exception of 68,105 acres.

Five per cent of the winter wheat area was winter-killed or destroyed by floods or Hessian fly, leaving 1,336,267 acres of wheat (spring and winter) for harvest.

The average yield per acre of spring and winter wheat was 17 bushels, the total yield being 22,722,316 bushels.

The ruling price of wheat August 1 was 78 cents per bushel, and the value of the entire crop at this price amounted to \$17,621,462.

Hessian fly was reported from Henderson, Marshall, Putnam, Champaign, Cumberland, Fulton, Hancock, McDonough, Menard and Schuyler counties and smut from Jersey, Edwards, Jackson, Saline, St. Clair and Wabash counties.

The following table gives the area, yield and value of the wheat crop of the State during the past fifty-one years:

## WHEAT (SPRING AND WINTER).

Year.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860	2,109,471	11.3	23,837,023	\$0 85	\$20,261,469	\$ 9 60	\$10 55	\$22,254,919		\$1,993,45

## WHEAT CONSUMPTION.

In estimating the amount of wheat required in the State for seed and bread, it is necessary to consider the entire area seeded instead of that harvested, as the amount required for seed is based on the area seeded last year, which was 1,405,372 acres. As one and one-third bushels per acre is used for seed, it will require 1,875,829 bushels to seed next year's crop.

Allowing four bushels per capita for food, it takes, according to the 1910 census, which gives Illinois 5,638,591 inhabitants, 22,554,364 bushels for that purpose, so that 24,428,194 bushels will be required for home use. As but 22,722,316 bushels were raised in this State this year, it will be necessary to import 1,705,873 bushels or equivalent in flour to fill the demand of the home market.

## OATS.

The area seeded to oats for 1911 was reported as 2,766,087 acres, of which 1,664,460 acres are reported from northern Illinois, 886,677 acres from central Illinois and 214,950 acres from the southern division of the State.

The average yield was 31 bushels to the acre, the total yield amounting to 85,632,301 bushels. Northern Illinois reports the yield as 35 bushels per acre, central Illinois 28 bushels and southern Illinois but 13 bushels.

The unseasonable hot weather of May and June, together with a lack of moisture during these two months, cut short the yield of this crop, tho the quality of the grain was better than expected.

In the southern division of the State the oats crop was a "near failure," as much of the straw was too short to harvest with a binder and was mown.

The ruling price of oats on August 1 was 35 cents per bushel, and the value of the crop at this price amounted to \$30,232,813.

The following table gives the area, yield and value of the oats crop of the State during the past fifty-one years.

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oats crop in each county in the State this year.

## CROP REPORT.

7

## WINTER RYE.

There are 49,356 acres of rye reported this year. The average yield per acre was 18 bushels, and the total yield amounted to 902,501 bushels. The average price August 1 was 73 cents per bushel, the highest price recorded since 1881, and the value of the crop at this price amounted to \$660,029.

The following table gives the area, yield and value of the past fifty-one rye crops grown in State.

	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.

## BARLEY.

There are 33,274 acres of barley reported this year. The average yield was 27 bushels per acre, the total yield being 907,923 bushels.

The ruling price per bushel on August 1 of 80 cents, is the highest price recorded since 1874, the value of the entire crop being \$726,521.

The following table gives the area, yield and value of the last fifty-one barley crops produced in the State:

Year.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

## CROP REPORT.

9

## HAY.

The area devoted to meadows is reported as 1,900,077 acres. Meadows suffered greatly from the drought and the average yield of  $\frac{2}{3}$  of a ton is the highest recorded since 1895. The total yield amounted to 1,240,413 tons.

The average price per ton on August 1 was \$17.44, the highest price obtained in the history of these reports, and the total value of the crop amounted to \$21,631,209.

The August 1 condition of clover was 93 per cent of normal and the average yield for the State was  $\frac{7}{8}$  of a ton per acre.

The following table gives the area, yield and value of the last fifty-one hay crops produced in this State:

Year.	Number of acres harvested.	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## CROP REPORT.

## CORN.

There is a decrease of 260,812 acres reported in the area devoted to corn as compared with 1910, the total acreage being 6,628,909 acres.

Northern Illinois reports 2,860,605 acres; central Illinois, 2,926,184 acres, and southern Illinois, 842,120 acres.

The August 1 condition of corn in northern Illinois is reported as 89 per cent of normal, 74 per cent in central Illinois and 56 per cent in southern Illinois, a State average of 73 per cent, which is a decrease of 15 points in the condition of corn since the June 20th report.

The long spell of hot weather and lack of sufficient rainfall are responsible for this decrease in the condition of corn. Late planted corn is in better shape than the early planted.

Many barren stalks are reported as the extreme heat burned the tassel before ears were formed.

Corn is reported as firing in DeKalb, Grundy, Iroquois, McHenry, Mercer, Winnebago, Douglas, McDonough, Sangamon, Jasper, Marion and Perry counties.

Chinchbugs are reported from Jersey, Macoupin, Bond, Franklin, Jasper, Marion, Perry, Richland, St. Clair and Washington counties.

## BROOM CORN.

The August 1 conditions of broom corn is 92 per cent in northern Illinois, 74 per cent in central Illinois and 67 per cent in the southern division, a State average of 78 per cent.

## SORGHUM.

The condition of sorghum August 1 was 87 per cent in northern Illinois, 75 per cent in central Illinois and 62 per cent in the southern division, a State average of 75 per cent.

## PASTURES.

A decrease of 186,815 acres is reported in the area of pastures as compared with 1910, the total area being 3,783,487 acres.

Northern Illinois reports 1,985,597 acres, central Illinois 1,229,418 acres and southern Illinois 568,472 acres.

Continual drought and hot weather cut short the growth of pastures and their August 1 condition is but 45 per cent of normal, being 49 per cent in northern Illinois, 47 per cent in central Illinois and 40 per cent in the southern division of the State.

## IRISH POTATOES.

The August 1 condition of Irish potatoes is reported as but 31 per cent of normal, being 48 per cent in northern Illinois, 23 per cent in central Illinois and 22 per cent in southern Illinois.

## SWEET POTATOES.

The condition of this crop on August 1 is 67 per cent of a seasonable average in northern Illinois, 52 per cent in central Illinois and 47 per cent in southern Illinois, a State average of 55 per cent.

## BUCKWHEAT.

A decrease of 8 per cent in the area of buckwheat, as compared with 1910, is reported.

The August 1 condition of buckwheat is 89 per cent of normal in northern Illinois, and 79 per cent in both the central and southern divisions of the State.

## TURNIPS AND OTHER ROOT CROPS.

The area of turnips and other root crops is 7 per cent less than in 1910, and their August 1 condition is 74 per cent of a seasonable average.

## CASTOR BEANS.

But two counties, Sangamon and Hamilton, report on castor beans, where the August 1 condition is given as 95 per cent and 75 per cent respectively.

## TOBACCO.

In the northern division of the State, JoDaviess is the only county which reports on tobacco, where the August 1 condition is but 50 per cent of normal.

In Douglas, the only county in the central division reporting on tobacco, the condition is given as 90 per cent of normal.

In the southern division of the State the August 1 condition is 53 per cent of normal.

## COW PEAS.

In northern Illinois the August 1 condition of cow peas is 92 per cent of normal, in central Illinois 79 per cent and in southern Illinois 70 per cent.

## FIELD BEANS.

The August 1 condition of field beans was 88 per cent of a seasonable average in northern Illinois, 75 per cent in central Illinois and 69 per cent in the southern division of the State.

## FRUIT.

According to the reports of our correspondents, fruit, especially apples and peaches, will be most abundant. On account of the heavy yield, a great deal of fruit is reported small in size, tho the quality is generally good.

## APPLES.

The August 1 condition of apples in northern Illinois was 98 per cent of normal, 89 per cent in central Illinois and 51 per cent in the southern division of the State.

San Jose scale is reported from Clinton and Richland counties.

## PEACHES.

The August 1 condition of peaches is 80 per cent of normal in northern Illinois, 79 per cent in central Illinois and 58 per cent in the southern division of the State.

## PEARS.

The August 1 condition of pears is 78 per cent of normal in northern Illinois, 64 per cent in central Illinois and 53 per cent in southern Illinois.

## PLUMS.

In northern Illinois the August 1 condition of plums was 79 per cent of a seasonable average, in central Illinois 72 per cent and 55 per cent in the southern division of the State.

## GRAPES.

In northern Illinois the August 1 condition of grapes is 96 per cent of normal, in central Illinois 90 per cent and in southern Illinois 88 per cent.

## BLACKBERRIES.

The blackberry crop this year was 70 per cent of an average yield in northern Illinois, 57 per cent in central Illinois and 71 per cent in southern Illinois.

## QUINCES.

But very few counties report on the condition of quinces. Their August 1 condition in northern Illinois is 77 per cent of normal, in central Illinois 62 per cent and in southern Illinois 53 per cent.

## LIVE STOCK.

Stock is reported as rather thin in flesh, due to the shortage of pastures. Pinkeye affected cattle in Cook, Douglas, Crawford, Fayette and Wayne counties.

Distemper is reported from Ford, Greene, Pike and Schuyler counties.

Hog cholera is reported from DeKalb, Henry, Mercer, Ogle, Warren, Cass, Christian, Douglas, Hancock, Jersey, Macoupin, McDonough, Menard, Morgan, Pike, Sangamon, Schuyler, Scott, Shelby, Vermilion, Edwards, Fayette, Madison, Wabash and Wayne counties. Anthrax is reported from Edwards county.

#### DRAIN TILE.

So far as can be ascertained, there are now 747,990,493 feet of drain tile in the State, which gives an average of 29 feet to each acre of cultivated land in Illinois.

#### AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years will be found to closely approximate the assessors' returns.

J. K. DICKIRSON,  
Secretary.

#### NOTE.

The county clerks of the following counties, viz.: Bureau, DuPage, Henderson, Iroquois, Lee, Whiteside, Ford, Wabash and Williamson, furnished the tabulated schedules of agricultural statistics of their counties in accordance with the law, and computations for those counties are based on their reports.

# ILLINOIS CROP REPORT

FOR

DECEMBER 1, 1911.

---

## SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, December 1, 1911.

The information contained in this report as to the acreage of crops and number of head of live stock was obtained from the reports of assessors made to this Department as required by law.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number three hundred, and represent every section of the State.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-four years, and their estimates, for a term of years, when compared with subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WINTER GRAIN.

#### WHEAT.

On account of the excessive rains at seeding time, a decrease of 8 per cent in the area seeded to wheat this fall is reported.

Northern Illinois reports 113,705 acres, central Illinois 537,131 acres and southern Illinois 587,070 acres, a total area of 1,237,906 acres.

The December 1 condition of the growing crop was 94 per cent of a seasonable average in northern Illinois, 77 per cent in central Illinois and 76 per cent in southern Illinois, a State average of 82 per cent.

## CROP REPORT.

## RYE.

The area seeded to rye is reported as 45,602 acres, a decrease of 5 per cent, as compared with last year.

Northern Illinois reports 37,262 acres, central Illinois 5,859 acres, and southern Illinois 2,481 acres.

The condition of this crop December 1 was 89 per cent of a seasonable average, being 97 per cent in northern Illinois, 86 per cent in central Illinois and 84 per cent in the southern division of the State.

## CORN.

The area of the corn crop of 1911 was reported as 6,623,579 acres, a decrease of 4 per cent, as compared with the area of 1910.

Northern Illinois reported 2,845,493 acres, central Illinois 2,932,568 acres and southern Illinois 845,518 acres.

The average yield per acre was 42 bushels in northern Illinois, 37 bushels in central Illinois and 25 bushels in southern Illinois, a State average of 38 bushels.

The total corn crop amounted to 248,953,114 bushels.

The ruling price of corn December 1 was 55 cents per bushel and the total value of the crop amounted to \$136,075,513.

The quality of the grain was reported as but 82 per cent of normal, being 94 per cent in northern Illinois, 80 per cent in central Illinois and 73 per cent in the southern division of the State.

Chinchbugs injured corn in Christian, Cumberland, Macoupin, Montgomery, Clinton, Effingham, Fayette, Jackson, Jefferson, Madison, Marion, Randolph, Washington and Wayne counties.

## CROP REPORT.

5

The area, yield and value of the corn crop of the State for the past fifty-two years is given in the following table:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel—cents.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## CROP REPORT.

## BROOM-CORN.

The area devoted to broom-corn is reported as 12,577 acres.

The average yield per acre was 667 pounds, the total yield amounting to 7,506,000 pounds.

The ruling price December 1 was \$177 per ton and the total value of the crop amounted to \$663,966.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876:

Year.	Acreage.	Av. yield per acre— pounds.	Total yield— pounds.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,747	\$ 71 20	\$ 237,594
1878.....	18,258	614	11,218,168	49 50	277,645
1879.....	17,664	632	11,161,238	86 75	484,195
1880.....	18,652	775	14,457,156	77 40	559,447

## CROP REPORT.

7

## SORGHUM.

The area devoted to sorghum this year reported as 4,803 acres. The average yield per acre was 79 gallons and the total yield 379,381 gallons.

The ruling price December 1 was 63 cents per gallon, the total value of the product being \$239,979.

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

Year.	Acreage.	Av. yield per acre— gallons.	Total number of gallons.	Price per gallon.	Value of crop.
1877.....	19,335	63	1,237,164	\$0 42	\$515,409

## CROP REPORT.

## BUCKWHEAT.

The area devoted to buckwheat is reported as 1,458 acres.

The average yield per acre was 13 bushels and the total yield 19,086 bushels.

The ruling price December 1 was 88 cents per bushel, making the total value of the crop \$16,817.

The following table gives the area, yield and value of the buckwheat crop in this State for the past thirty-five years:

Year.	Acreage.	Av. yield per acre— bushels.	Total number of bushels.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,693	\$0 73	\$151,612

## CROP REPORT.

9

## TIMOTHY SEED.

There were 46,135 bushels of timothy seed reported produced in 1911.

The average price per bushel was \$5.75, and the total value of the crop at this price amounted to \$265,322.

The following table gives the amount and value of the crop in this State since and including 1877:

Year.	Bushels produced.	Price per bushel.	Value of crop.
1877.....	483,571	\$1 25	\$ 604,464
1878.....	261,559	1 25	326,949

## HUNGARIAN AND MILLET SEED.

There were 17,452 bushels of Hungarian and millet seed produced in 1911.

The ruling price December 1 was \$1.00 per bushel, making the total value of the crop \$17,114.

The following table gives the yield and value of this crop since 1876:

Year.	Bushels produced	Price per bushel.	Value of crop.
1877	17,463	\$0 65	\$10,701
1878	26,787	55	14,733

## BEANS.

There are 914 acres devoted to beans reported in 1911. The average yield per acre was 11 bushels and the total yield amounted to 10,481 bushels.

The ruling price December 1 was \$2.65 per bushel, and at this price the crop was worth \$27,693.

The following table gives the area, yield and value of the 1911 crop of beans, together with those of thirty-four years preceding:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	1,545	13	19,955	\$1 50	\$29,916

## CROP REPORT.

13

## CASTOR BEANS.

The area devoted to castor beans is reported as 5,819 acres and the average yield per acre 13 bushels, making the total yield 75,647 bushels.

The ruling price December 1 was \$1.10 per bushel and the total value of the crop amounted to \$82,613.

In the following table is given the area, yield and value of this crop since 1877:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	4,503	34	17,538	\$1 10	\$ 18,512

## TOBACCO.

There were but 662 acres of tobacco reported in 1911.

The average yield per acre was 854 pounds, the total yield amounting to 565,250 pounds.

The total value of the crop, at the ruling price of 10 cents per pound on December 1, was \$55,707.

The following table gives the area, yield and value of the crop in this State since 1876:

Year.	Acreage.	Av. yield per acre— pounds.	Total number of pounds.	Price per pound.	Value of crop.
1877.....	12,320	640	7,885,586	\$0 08	\$638,848

## PASTURES.

The area devoted to pastures in 1911 is reported as 3,819,412 acres.

The average value per acre for the season of 1911 was \$4.70 and the total value amounted to \$18,048,403.

The following table gives the area and value of pastures for thirty-five years past:

Year.	Acreage.	Value per acre.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112

## IRISH POTATOES.

The area devoted to Irish potatoes in 1911 was reported as 76,261 acres.

The average yield per acre was 57 bushels and the total yield amounted to 4,382,092 bushels.

The average price per bushel December 1 was 85 cents, making the total value of the crop \$3,715,788.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## CROP REPORT.

17

## SWEET POTATOES.

The area devoted to sweet potatoes in 1911 was 1,900 acres.

The total yield amounted to 135,704 bushels, an average of 71 bushels per acre.

The ruling price December 1 was \$1.00 per bushel and the total value of the crop at this price amounted to \$134,427.

The following table gives the area, yield and value of the sweet potato crop of the State for the past thirty-five years:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	2,355	63	148,270	\$0 85	\$126,092

## TURNIPS AND OTHER ROOT CROPS.

A decrease of 7 per cent is reported in the area of turnips and other root crops, 328 acres being reported.

The average value per acre is \$649.39, and the total value \$213,005.

The average yield of turnips per acre was 104 bushels.

The following table gives the acreage and value of turnips and other root crops grown in the State during the past thirty-five years:

Year.	Acreage.	Value per acre.	Value of crop.
1877.....	7,056	\$ 39 55	\$279,136
1878.....	3,775	40 85	154,140

## FRUIT.

A large yield of fruit was reported from all sections of the State.

## APPLES.

Northern Illinois reports the yield of apples 177 per cent as compared with 1910, central Illinois 208 per cent, and southern Illinois 122 per cent.  
The average price of apples per bushel was 75 cents.

## PEACHES.

Northern Illinois reports the yield of peaches 173 per cent as compared with 1910, central Illinois 168 per cent and southern Illinois 115 per cent.  
The average price of peaches was 90 cents a bushel.

## PEARS.

Northern Illinois reports the yield of pears 147 per cent as compared with 1910, central Illinois 140 per cent and southern Illinois 99 per cent.  
The average price of pears per bushel was 90 cents.

## GRAPES.

There were 750,491 pounds of grapes produced in Illinois this year. Of this amount 658,388 pounds were reported from the southern division of the State.

The average price of 3 cents per pound gives a total value of \$19,135.

The following table gives particulars concerning the grape crop of the State for the past thirty-five years:

Year.	Pounds produced.	Price per pound.	Value of crop.

## CROP REPORT.

## WINE.

The area in vineyards this year, 738 acres, is 2 per cent less than in 1910.

There were 4,147 gallons of wine reported produced in 1911, being an average of 5 gallons per acre.

The average price per gallon was \$1.00, the total value of the product at this price amounting to \$4,062.

The following table gives the number of gallons of wine and the value thereof during the past thirty-five years:

Year.	Acreage.	Av. yield per acre— gallons.	Number of gallons produced.	Price per gallon.	Value of crop.
1877.....	2,612	61	158,944	\$1 20	\$191,933

## CROP REPORT.

## STRAWBERRIES.

The value of the strawberry crop for 1911 was reported as \$64,365, of which \$24,537 was reported from northern Illinois, \$8,192 from central Illinois, \$31,636 from the southern division of the State.

## WATERMELONS.

The value of watermelons sold in 1911 in northern Illinois is reported as \$35,983, in central Illinois \$7,865, in southern Illinois \$13,898, a total value of \$57,746.

## OTHER CROPS NOT NAMED.

There are a number of crops raised in this State which are cultivated only in limited localities, and are not of sufficient importance to be tabulated alone, but are of considerable value to producers.

The value of these miscellaneous crops for 1911 was reported as \$112,585.

## BEES AND HONEY.

There were 314,523 pounds of honey produced in 1911.

The average price obtained for that sold was 16 cents per pound, making the total value \$51,258.

The total number of hives of bees reported for 1911 was 82,022.

The following table gives the amount and value of honey produced in this State during the past twenty-one years, together with the number of hives of bees:

Year.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees.
1891.....	821,678	\$0 14	\$112,934	120,252

## LIVE STOCK.

## HOGS.

According to the assessors' returns, there were 1,502,023 hogs in the State May 1, 1911. At the equalized value of \$2.21 per head, they were worth \$3,319,471.

The number marketed was 1,246,677, or 83 per cent of the whole number. The average weight of those marketed was 199 pounds, giving a total gross weight of 248,046,524 pounds. The average price per cwt. of hogs marketed was \$6.10, their value at this rate being \$15,160,592.

The supply of hogs on hand December 1 was 79 per cent and the average price per cwt. on that date \$5.80.

Hog cholera was reported from seventy-seven counties of the State.

## CROP REPORT.

23

The following table gives the number of hogs assessed and marketed in 1911, as well as their weight and value, for the past fifty-six years:

Year.	Assessors' Returns.		Estimated per cent marketed.	Number fat hogs marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.

## BEEF CATTLE.

The number of cattle in the State May 1, 1911, according to assessors' returns, was 1,473,741. At the equalized value of \$8.64 per head, they were worth \$12,733,122. Twenty-three per cent of the whole, 338,957 were marketed during the year.

## CROP REPORT.

The average weight was 1,079 pounds, making the total weight 365,809,570 pounds.

The average price of those sold prior to December 1 was \$5.25 per cwt., a total value of \$19,242,750.

The supply of beef cattle on hand December 1, 1911 was 84 per cent and the average price per cwt. on that date \$5.30.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

Year.	Assessor's Returns.		Estimated per cent marketed.	Number beef cattle marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value beef cattle marketed.

## DAIRY COWS.

There were 542,060 dairy cows reported in Illinois in 1911.

The average value per head was \$49.00, making the total value \$26,814,998.

The following table gives the number and value of the dairy cows kept in Illinois since 1878:

Year.	Number.	Av. value per head.	Total value.
1879.....	571,628	\$31 00	\$17,720,468
1880.....	613,738	31 00	19,035,878

## CROP REPORT.

## HORSES.

The number of horses reported by assessors this year is 961,329 and their equalized value per head \$27.03, the total value amounting to \$25,984,723.

The number of colts reported foaled in 1910 was 85,311. Distemper is reported from Kane, Edgar, Alexander, Jackson and Randolph counties.

The following table gives the number of horses assessed in the State since 1855 and their equalized valuation, as well as the number of colts foaled each year since 1878:

Year.	Assessors' Returns.		Number colts foaled.

## SHEEP.

There were 396,183 sheep reported by assessors this year. Their equalized value is \$1.18 per head, making their total equalized value \$467,496.

## CROP REPORT.

27

Of the number assessed, 22 per cent, or 87,157, were marketed.  
 Their total gross weight amounted to 8,855,232 pounds, an average weight of 102 pounds.

The average price received for those marketed prior to December 1 was \$4.25 per cwt., making their total value \$375,341.

The supply of sheep on hand December 1 was 89 per cent as compared with last year, and the average price per cwt. \$4.00.

The following table gives the number, weight and value of the sheep marketed in the State since 1855:

Year.	Assessors' Returns.		Estimated per cent marketed.	Number fat sheep marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value sheep marketed.

## DAIRY PRODUCTS.

## MILK.

There were 99,439,581 gallons of milk sold in Illinois in 1911.

The average price was 18 cents per gallon and the total value amounted to \$18,291,145.

The following table gives the amount, price and value of the milk sold in the State for the past thirty-five years:

Year.	Gallons sold.	Price per gallon.	Total value.
1877.....	17,124,506	\$0 11½	\$ 1,912,236
1878.....	30,567,415	10½	3,209,579

Tables published elsewhere in this report give by counties the quantity and value of the dairy products of the State for 1911.

## POULTRY AND EGGS.

The value of the poultry sold in 1911 in northern Illinois was \$934,249, in central Illinois \$661,841 and in the southern division of the State \$530,167, a total value of \$2,126,257.

The total value of eggs sold in 1911 is reported as \$2,788,288, of which \$1,105,504 was reported from northern Illinois, \$631,972 from central Illinois and \$1,050,812 from the southern division of the State.

## SUMMARY.

The following table gives in small space the value of the principal farm products and live stock of Illinois for the year 1911:

Corn .....	\$ 136,075,513
Winter wheat .....	16,733,246
Spring wheat .....	888,216
Oats .....	30,232,813
Rye .....	660,029
Barley .....	726,521
Buckwheat .....	16,817
Hay .....	21,631,209
Timothy seed .....	265,322
Clover seed .....	443,744
Hungarian and millet seed .....	17,114
Irish potatoes .....	3,715,788
Sweet potatoes .....	134,427
Turnips and other root crops .....	213,005
Broom-corn .....	663,966
Sorghum .....	239,979
Beans .....	27,693
Castor beans .....	82,613
Tobacco .....	55,707
Other crops not named .....	112,585
Grapes .....	19,135
Strawberries .....	64,365
Watermelons .....	57,746
Other fruits and berries .....	34,467
Wine .....	4,062
Honey .....	51,258
*Horses (equalized value) .....	25,984,723
*Beef cattle (equalized value) .....	12,733,122
Dairy cows .....	26,814,998
*Hogs (equalized value) .....	3,319,471
*Sheep (equalized value) .....	467,496
Wool .....	316,869
Milk sold .....	18,291,145
Cream sold .....	2,569,528
Butter sold .....	2,837,333
Cheese sold .....	109,136
Poultry sold .....	2,126,257
Eggs sold .....	2,788,288
Total .....	\$ 311,525,706

\*NOTE—The equalized value as fixed by the State Board of Equalization, represents but one-fifth of the actual value.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition of yield of the harvested crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for the term of years will be found to closely approximate the assessors' returns.

J. K. DICKERSON, Secretary.

## NOTE.

The county clerks of the following counties, viz., Boone, Bureau, DuPage, Henderson, Iroquois, Lee, Livingston, Putnam, Whiteside, Winnebago, Ford, Montgomery, Scott, Edwards, Gallatin, Wabash and Williamson furnished the tabulated schedules of agricultural statistics of their counties in accordance with the law and computations for these counties are based on their reports.

\*If the product had been sold at prevailing prices, December 1, it would have returned this amount to the producer.

NAMES AND POSTOFFICE ADDRESSES  
of  
**CROP CORRESPONDENTS**  
STATE BOARD OF AGRICULTURE

FOR THE YEAR 1911

WITH DATE OF APPOINTMENT.

**ADAMS COUNTY—**

- 1879. G. W. Dean, R. F. D. No. 1,  
Adams.
- 1883. H. C. Cupp, Fall Creek.
- 1888. C. H. Rankin, Payson, Star  
Route.
- 1904. A. R. Wallace, Jr., Camp Point.

**ALEXANDER COUNTY—**

- 1907. G. W. Childress, Olive Branch.
- 1909. J. L. King, Elco.
- 1909. Herman Bunch, McClure.

**BOND COUNTY—**

- 1885. W. H. Taylor, Greenville.
- 1898. L. E. Alexander, Reno.
- 1908. N. Cowen, Sorento.
- 1910. E. E. Mitchell, Greenville.

**BOONE COUNTY—**

- 1899. O. S. Cohoon, Belvidere.
- 1909. Phil H. Sanford, Garden Prairie.
- 1911. C. W. Colton, 1519 Pearl st.,  
Belvidere.

**BROWN COUNTY—**

- 1889. W. B. Rigg, Mt. Sterling.
- 1909. E. F. Byrns, Mt. Sterling, R. F.  
D.
- 1909. C. J. Davis, Timewell.
- 1909. J. M. Cronin, Mt. Sterling, R. F.  
D.

**BUREAU COUNTY—**

- 1897. O. W. Mason, Buda.
- 1907. D. D. Draper, New Bedford.
- 1907. Frank J. Nye, Princeton.
- 1907. John Johnson, Walnut, R. F. D.  
No. 4.
- 1907. E. B. Anthony, Tiskilwa.

**CALHOUN COUNTY—**

- 1881. M. A. Kamp, Kampsville.
- 1909. Wm. Franke, Batchtown.

**CARROLL COUNTY—**

- 1909. Wm. Phillips, Mt. Carroll.
- 1909. Geo. Lang, Chadwick.

**CASS COUNTY—**

- 1878. W. W. Mathew, Petersburg, R.  
R. No. 2.
- 1903. M. L. Crum, Virginia.

**CHAMPAIGN COUNTY—**

- 1908. Dr. F. M. Conkey, Homer.
- 1885. W. E. Dawley, Seymour, R. F.  
D. No. 43.
- 1907. R. E. Chambers, Sadorus.
- 1907. Reuben Roughton, Rantoul.

**CHRISTIAN COUNTY—**

- 1877. A. B. Herdman, Morrisonville.
- 1878. O. S. Nash, Sharpsburg.
- 1897. Basil Hill, Taylorville.
- 1904. J. Earl White, Morrisonville.
- 1908. C. W. Ebert, Owaneco.
- 1909. E. Dixon, Pana.
- 1910. Albert Davis, Taylorville.

**CLARK COUNTY—**

- 1880. Jerry Ishler, Martinsville, R. R.  
No. 4.
- 1909. T. W. Richards, West York.

**CLAY COUNTY—**

- 1904. Leslie F. Brissenden, Flora.
- 1904. Jno. T. Campbell, Louisville.

**CLINTON COUNTY—**

- 1909. Jos. Heimann, Albers.
- 1901. Frank Bassler, Trenton.
- 1907. Theo. W. Timmerman, Breese.

**COLES COUNTY—**

- 1905. John W. Black, Humboldt.
- 1905. James A. Walker, Lerna.
- 1905. E. E. Boyer, Ashmore.
- 1909. Sam Rardin, Rardin.

**COOK COUNTY—**

- 1880. E. Wheeler, Arlington Heights.
- 1907. M. L. Staples, Palatine.
- 1907. John T. Cooper, Orland.
- 1907. C. Doctor, Orland.

## CRAWFORD COUNTY—

- 1877. William L. Heustis, Robinson.
- 1882. William F. Wood, Oblong.
- 1897. W. M. Hart, Annapolis.
- 1900. Clinton Newlin, Hutsonville.
- 1909. T. W. Richards, West York.

## CUMBERLAND COUNTY—

- 1882. James M. Albin, Neoga.

# ILLINOIS CROP REPORT

FOR

May 1, 1912

## SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, May 1, 1912.

The information contained in this report was obtained from the reports of correspondents mailed to this department the first day of May.

The correspondents are, as a rule, representative farmers of extended experience who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-five years, and their estimates for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred and are so distributed over the State as to fairly represent each locality.

The State covers an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WINTER WHEAT.

Wheat was generally seeded late on account of the excessive rainfall last year and had not acquired sufficient growth and strength to successfully withstand the severe winter and of the 1,237,906 acres seeded last fall for harvest in 1912, it is estimated that 699,026 acres or 56 per cent has been winter-killed, leaving but 538,880 acres for harvest.

In northern Illinois the area destroyed was 84 per cent, in central Illinois 78 per cent, and in southern Illinois 32 per cent.

The condition of the growing crop on May 1 was 55 per cent of normal in northern Illinois, 43 per cent in central Illinois and 65 per cent in southern Illinois, a State average of 54 per cent, which is the lowest condition reported since 1899.

Chinchbugs are reported from Marion, Perry and Washington counties.

### SPRING WHEAT.

A decrease of 15 per cent in the area seeded to spring wheat is reported this year and the May 1 condition is 92 per cent of normal.

## CROP REPORT.

## OLD WHEAT.

Of the 22,722,316 bushels of wheat raised in Illinois last year it is estimated that there was on May 1, 1,877,638 bushels or about 8 per cent in the producers' hands.

Northern Illinois reports 8 per cent in first hands, central Illinois 6 per cent and southern Illinois 11 per cent.

The following table gives the amount of old wheat in first hands May 1, since and including 1880.

Year Produced.	Crop in bushels.	Per cent crop on hand following May 1.	Amount crop in producer's hands following May 1.	Surplus wheat above seed and consumption at harvest.	Deficit at harvest.
1880.....	56,508,309	15	8,476,246	39,851,883	.....
1881.....	22,374,163	13	2,924,039	5,765,414	.....

1910.....	18,702,068	11	1,972,607	.....	2,280,835
1911.....	22,722,316	8	1,877,638	.....	1,705,873
Average.....	26,036,066	13	3,289,683	12,461,236	3,496,981

## WINTER RYE.

There were 45,602 acres reported seeded to rye last fall and the May 1 report shows that 34 per cent of it has been winter-killed, leaving but 30,169 acres for harvest.

The May 1 condition of winter rye is 82 per cent of normal in northern and central Illinois and 77 per cent in the southern division of the State, a State condition of 80 per cent.

## OATS.

There is a decrease of 12 per cent in the area seeded to oats for the 1912 crop, as compared with last year.

The May 1 condition of oats is 89 per cent of an average in northern Illinois, 79 per cent in central Illinois and 72 per cent in southern Illinois, a State average of 80 per cent.

## BARLEY.

There is an increase of 1 per cent in the area devoted to barley in northern Illinois and its May 1 condition is 94 per cent of normal.

But very little barley is grown in the central and southern divisions of the State.

## OLD CORN.

The Illinois corn crop of 1911, as reported to this Department was 248,953,114 bushels. Of this amount about 25 per cent or 61,783,574 bushels, was in the producers' hands on May 1.

McLean county reported the largest corn crop in 1911, that of 9,620,394 bushels.

The following table gives the amount of old corn in the producers' hands May 1, the past thirty-three years, as well as the extent of the crop produced each year:

Year Produced.	Crop.	Per cent corn on hand following May 1.	Bushels corn in producers' hands following May 1.
1879.....	305,913,277	32	99,229,889
1880.....	250,697,036	28	71,929,343
1881.....	174,491,706	21	37,445,964

1911.....	248,953,114	25	61,783,574
Average .....	235,192,092	30	70,773,069

## MEADOWS.

The area devoted to meadows is 86 per cent as compared with last year. Meadows are not as far advanced as usual and their May 1 condition is 78 per cent of normal in northern Illinois, 88 per cent in central Illinois and 90 per cent in southern Illinois, a State condition of 85 per cent.

Much clover is reported winter-killed.

## PASTURES.

There is a deficiency of 6 per cent in the area of pastures as compared with 1911.

The cool weather has retarded the growth of pastures and their May 1 condition is 86 per cent of normal.

## SPRING PLOWING.

About two-thirds of the entire amount of spring work is usually completed by May 1, but owing to the late spring and frequent rains, only one-fourth of the work is reported as finished on May 1.

The condition of the soil throughout the State, with but few exceptions, is reported as wet and heavy on May 1.

## CROP REPORT.

## LIVE STOCK.

## HORSES.

The number of horses reported May 1 is 97 per cent as compared with 1911, and their May 1 condition is 92 per cent of normal.

Distemper is reported from Grundy, Kane, Knox, Champaign, Douglas, Edgar, Macon, McDonough, Morgan, Moultrie, Sangamon and Randolph counties.

## MULES.

There is a deficiency of 3 per cent in the number of mules in the State this year as compared with 1911, and their May 1 condition is 76 per cent of normal.

## CATTLE.

The number of cattle reported this year is 87 per cent as compared with last year.

Their May 1 condition is reported as 91 per cent of normal in northern Illinois, 89 per cent in central Illinois and 84 per cent in the southern division of the State.

## DAIRY COWS.

The number of dairy cows is reported as 94 per cent as compared with 1911, and their May 1 condition is 92 per cent of normal.

## HOGS.

The number of hogs on hand May 1 is 76 per cent as compared with 1911, and their May 1 condition is 91 per cent of normal.

Hog cholera is reported from Mercer, Brown, Cass, Clark, DeWitt, Douglas, Edgar, Fulton, Hancock, Jersey, Macoupin, Pike, Schuyler, Effingham and Madison counties. A number of counties report quite a loss of spring pigs.

## SHEEP.

The number of sheep reported is 92 per cent as compared with last year, and their May 1 condition as 94 per cent of normal.

## FRUIT.

The prospect for fruit on May 1 was favorable with the exception of peaches, which crop is reported a failure throughout the State.

San Jose scale is reported from Franklin and Perry counties.

## BEES.

Bees are reported as having suffered from the severe winter and many colonies have perished.

## CROP REPORT.

7

## WAGES PAID FARM HANDS.

There is a slight increase in the wages paid to farm hands, but the supply of help is reported not equal to the demand.

The average wages paid farm hands for the past thirty-three years is given in the following table:

Division.	Per Day.		Per Month.	
	With board.	Without board.	With board.	Without board.
Northern.....	\$1 10	\$1 40	\$21 85	\$29 85
Central.....	90	1 20	19 45	25 95
Southern.....	70	95	15 95	22 15
Average.....	\$0 90	\$1 20	\$19 10	\$26 00.

## CROP REPORT.

The wages paid farm help in the three divisions of the State, during the past thirty-three years, are given in the following tables:

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimate of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not intended that these reports will exactly coincide with the official assessor's returns, but they do represent the condition or yield of the various crops, etc., at the date given, as estimated by men experienced in this work, and their estimates for a term of years will be found to closely approximate the assessors' returns.

J. K. DICKIRSON, Secretary.

# ILLINOIS CROP REPORT

FOR

JUNE 20, 1912

---

## SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

Illinois State Board of Agriculture  
Springfield, June 20, 1912.

The information contained in this report was obtained from the reports of correspondents mailed to this office the twentieth of June.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-one years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### CORN.

An increase of 2 per cent is reported in the area devoted to corn, as compared with 1911.

The June 20 condition of corn is rather unfavorable, being but 80 per cent of normal, due to much inferior seed, late planting and unseasonable weather.

The condition of corn on June 20 in northern Illinois is 79 per cent of normal, in central Illinois 81 per cent, and in southern Illinois 82 per cent.

The quality of seed corn was but 74 per cent of an average.

The earliest appearance of corn above ground was April 1, which date was reported from Hamilton county, though most of it appeared between the 19th and 20th of May.

Cut-worms, grub worms, root lice, ants and chinch bugs have injured corn in many counties of the State.

### BROOM CORN.

The area of broom corn is 86 per cent as compared with 1911 and the June 20 condition is 88 per cent of normal.

## SORGHUM.

There is a decrease of 6 per cent in the area of sorghum this year.

In northern Illinois its June 20 condition is 87 per cent of normal, in central Illinois 89 per cent and in southern Illinois 81 per cent.

## WINTER WHEAT.

The June 20 condition of winter wheat in northern Illinois was 40 per cent, in central Illinois 41 per cent and in southern Illinois 54 per cent, a State average of 45 per cent, a decrease of 9 points since the May 1 report.

Hessian fly is reported from Adams, Clinton, Franklin, Jefferson, Marion, Saline and Union counties. Chinch bugs are reported from Jersey, Clinton, Fayette, Jefferson, Marion, Perry, Randolph, Richland and Washington counties.

## SPRING WHEAT.

There is a decrease of 9 per cent in the area of this crop in northern Illinois, where practically all the spring wheat is raised, and the June 20 condition is reported as 89 per cent of normal.

## OATS.

The June 20 condition of oats is 93 per cent of normal in northern Illinois, 90 per cent in central Illinois and 80 per cent in the southern division, a State average of 88 per cent, which is 8 points better than the May 1 condition.

Smut is reported from Adams, Logan, Tazewell and Perry counties and rust from Morgan and Tazewell counties.

## RYE.

The June 20 condition of rye is reported as 82 per cent of normal, being 85 per cent in northern and central Illinois and 77 per cent in the southern division of the State.

## BARLEY.

The June 20 condition of barley in northern Illinois where most all of this crop is grown is 94 per cent of normal.

## MEADOWS.

There is a decrease of 14 per cent in the area of meadows as compared with 1911.

The June 20 condition of meadows is 83 per cent of normal, being 77 per cent in northern Illinois, 89 per cent in central Illinois and 82 per cent in the southern division of the State.

## CLOVER.

There is a decrease of 32 per cent in the area devoted to clover, as compared with 1911, much clover being winter-killed.

In northern Illinois the June 20 condition was 75 per cent of a seasonable average, in central Illinois 85 per cent and in southern Illinois 91 per cent, a State average of 84 per cent.

## ALFALFA.

The June 20 condition of alfalfa is reported from fifty-seven counties in the State and is 83 per cent of a seasonable average, being 73 per cent in northern Illinois, 86 per cent in central Illinois and 91 per cent in the southern division of the State.

## HUNGARIAN AND MILLET.

In northern Illinois the area of Hungarian and millet is 122 per cent as compared with 1911, in central Illinois 111 per cent and in southern Illinois 97 per cent.

## PASTURES.

There is a deficiency of 6 per cent in the area of pastures as compared with 1911.

The weather has been favorable for the growth of pastures, their June condition being 92 per cent of normal.

## IRISH POTATOES.

A decrease of 4 per cent in the area devoted to Irish potatoes, as compared with 1911, is reported.

Their June 20 condition is excellent, being 95 per cent of normal in northern Illinois, 97 per cent in central Illinois, and 94 per cent in the southern division of the State, a State average of 95 per cent.

## SWEET POTATOES.

There is a decrease of 1 per cent in the area devoted to sweet potatoes this year and their June 20 condition is 96 per cent of normal.

## FIELD BEANS.

The area of field beans is 100 per cent as compared with last year, and their June 29 condition is 94 per cent of a seasonable average.

## COW PEAS.

The area of cow peas as compared with 1911 is 102 per cent in the northern and southern divisions of the State and 112 per cent in the central division.

## TOBACCO.

No reports on area or condition of this crop were received from northern and central Illinois. The southern division reports the area 77 per cent as compared with 1911, and the June 20 condition as 91 per cent of normal.

## FRUIT.

According to the reports of the correspondents made to this department June 20th apples promise a fair yield, but the peach crop is a total failure.

The condition of small fruit is reported good and the yield as follows:

## CHERRIES.

In northern Illinois the yield is 45 per cent of a seasonable average, in central Illinois 68 per cent and in southern Illinois 92 per cent.

## STRAWBERRIES.

The yield of strawberries was 93 per cent of normal, being 91 per cent in northern Illinois, 96 per cent in central Illinois and 92 per cent in the southern division of the State.

## RASPBERRIES.

The yield of raspberries was 83 per cent of normal, being 91 per cent in northern Illinois, 80 per cent in central Illinois and 79 per cent in southern Illinois.

## GOOSEBERRIES.

Northern Illinois reports the yield of gooseberries as 91 per cent, central Illinois 87 per cent and southern Illinois 92 per cent, a State average of 90 per cent.

## CURRANTS.

The yield of currants is reported as 91 per cent in northern Illinois, 90 per cent in central Illinois and 85 per cent in southern Illinois, a State average of 89 per cent.

## VINEYARDS.

The area of vineyards as compared with 1911 is 95 per cent in northern and southern Illinois and 97 per cent in the central division of the State.

The June 20 condition of vineyards is reported as 93 per cent. of normal.

## YOUNG LIVE STOCK.

## PIGS.

The number of pigs reported this year as compared with 1911 is 79 per cent and their June 20 condition is 91 per cent of normal.

## LAMBS.

The number of lambs reported this year is 90 per cent as compared with 1911 and their June 20 condition is 97 per cent of normal.

## CALVES.

The number of calves reported this year is 94 per cent as compared with last year and their June 20 condition is 99 per cent of normal.

## COLTS.

The number of colts foaled this year, as compared with 1911, is 93 per cent and their June 20 condition is 97 per cent of normal in northern Illinois and 95 per cent in the central and southern divisions of the State.

The average value of colts at weaning time is reported as \$57 in northern Illinois \$58 in central Illinois and \$59 in southern Illinois.

The number of colts lost prior to weaning is reported as 11 per cent in northern Illinois, 12 per cent in central Illinois and 7 per cent in southern Illinois, a State average of 10 per cent.

The average cost of service of stallions in northern Illinois is reported as \$15, in central Illinois \$14, and in southern Illinois \$11.

## WOOL.

The wool clip of 1912 was 95 per cent as compared with last year, being 97 per cent in the northern and central divisions and 92 per cent in the southern division of the State.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting condition, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years will be found to closely approximate the assessors' returns.

J. K. DICKIRSON,  
Secretary.

# ILLINOIS CROP REPORT

FOR

AUGUST 1, 1912.

---

## SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

Illinois State Board of Agriculture,  
Springfield, August 1, 1912.

The information contained in this report was obtained from the reports of correspondents mailed to this office the first of August.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for many years, and their estimates, for a term of years, when compared with the subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The correspondents number three hundred, and are so distributed over the State as to fairly represent each locality.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WHEAT.

The area seeded to wheat for the crop of 1912 was 1,296,057 acres, all of which was winter wheat, with the exception of 53,151 acres.

Fifty-six per cent of the winter wheat area was winter-killed, leaving but 598,123 acres of wheat (spring and winter), for harvest, which is the smallest acreage ever recorded by this Department.

The average yield per acre was 10 bushels and the total yield amounted to 6,315,205 bushels.

The ruling price of wheat August 1 was 89 cents per bushel, and the value of the entire crop at this price amounted to \$5,656,269.

The following table gives the area, yield and value of the wheat crop of the State during the past fifty-two years:

## WHEAT (SPRING AND WINTER).

Year.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860	2,109,471	11.3	23,837,023	\$0 85	\$20,261,469	\$ 9 60	\$10 55	\$22,254,919		\$1,993,450

## WHEAT CONSUMPTION.

In estimating the amount of wheat required in the State for seed and bread, it is necessary to consider the entire area seeded instead of that harvested, as the amount required for seed is based on the area seeded last year, which was 1,296,057 acres. As one and one-third bushels per acre is used for seed, it will require 1,728,076 bushels to seed next year's crop.

Allowing four bushels per capita for food, it takes, according to the 1910 census, which gives Illinois 5,638,591 inhabitants, 22,554,364 bushels for that purpose, so that 24,282,438 bushels will be required for home use. As but 6,315,205 bushels were raised in the State this year, it will be necessary to import 17,967,233 bushels or equivalent in flour to fill the demand of the home market.

## OATS.

The area seeded to oats for 1912 was reported as 2,698,929 acres. An immense crop of oats, of good quality is reported this year, the total yield being 117,245,081 bushels, the largest yield reported since 1905.

Northern Illinois reports the yield as 45 bushels per acre, central Illinois 44 bushels and southern Illinois 29 bushels, an average yield of 43 bushels.

The average price per bushel of oats on August 1 was 31 cents and the value of the crop at this price amounted to \$36,578,951.

## CROP REPORT.

The following table gives the area, yield and value of the oats crop of the State during the past fifty-two years:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of the oats crop in each county in the State this year.

## CROP REPORT.

7

## WINTER RYE.

There are 32,596 acres of rye reported this year. The average yield per acre was 18 bushels, and the total yield amounted to 597,934 bushels.

The average price on August 1 was 72 cents per bushel, and the total value of the crop amounted to \$431,421.

The following table gives the area, yield and value of the past fifty-two rye crops grown in the State.

Year.	Number of acres.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

A table published elsewhere in this report gives the area, yield and value of rye in each county in the State.

## CROP REPORT.

## BARLEY.

There are 37,794 acres of barley reported this year. The average yield was 31 bushels per acre, the total yield being 1,188,723 bushels.

The ruling price per bushel on August 1 was 64 cents and the value of the crop amounted to \$757,451.

The following table gives the area, yield and value of the last fifty-two barley crops produced in the State:

Year.	Number of acres harvested.	Average yield per acre—bushels.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.
1860.....	45,058	23	1,036,334	\$0 49	\$ 507,803	\$11 26	\$10 55	\$ 475,362	\$ 32,441

In a table published elsewhere in this report will be found the area, yield and value of the barley crop in the State by counties.

## CROP REPORT.

9

## HAY.

The area devoted to meadows is reported as 1,651,940 acres.

The average yield per acre is 1½ tons, and the total yield amounted to 2,057,314 tons.

The total value of the crop amounted to \$28,830,089, an average price of \$14.00 per ton.

The August 1 condition of clover was 93 per cent of normal and the average yield for the State was 1½ tons per acre.

The following table gives the area, yield and value of the last fifty-two hay crops produced in this State:

Year.	Number of acres harvested.	Average yield per acre—tons.	Tons produced.	Price per ton.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## CROP REPORT.

## CORN.

There is an increase of 215,094 acres reported in the area devoted to corn as compared with 1911, the total area being 6,839,673 acres.

Northern Illinois reports 2,915,311 acres, central Illinois 3,099,754 acres, and southern Illinois 824,608 acres.

The August 1 condition of corn in northern Illinois is 84 per cent, in central Illinois 79 per cent and in southern Illinois 77 per cent, a State average of 80 per cent, which is 7 points better than the August 1 condition of a year ago.

Corn is from two to three weeks late and it will require a late season to mature the crop.

Rain was needed in northern and central Illinois on August 1. Excessive rains in the southern division damaged corn and prevented cultivation.

Chinch bugs are reported from Christian, Jersey, Macoupin, Shelby, Clinton, Crawford, Fayette, Franklin, Hamilton, Jasper, Marion, Monroe, Randolph and St. Clair counties, and root lice from Christian, Macoupin, McLean, Morgan, Moultrie, Schuyler, Shelby and Wayne counties. Grub worms are reported from Kane, Stephenson and Winnebago counties.

## BROOM CORN.

No report on the condition of this crop is received from the northern division of the State.

In central Illinois the condition on August 1 is reported as 81 per cent and in southern Illinois 75 per cent of normal.

## SORGHUM.

The condition of sorghum on August 1 was 80 per cent of normal in the northern and southern divisions and 86 per cent in the central division of the State.

## PASTURES.

There is a decrease of 229,750 acres in the area of pastures as compared with 1911, the total area being 3,589,662 acres.

Northern Illinois reports an area of 1,899,455 acres, central Illinois 1,131,606 acres and southern Illinois 558,601 acres.

● The condition of pastures is 86 per cent of normal in northern and central Illinois and 96 per cent in southern Illinois, a State average of 89 per cent.

## IRISH POTATOES.

The August 1 condition of Irish potatoes is reported as 93 per cent of normal in northern Illinois, 92 per cent in central Illinois and 96 per cent in the southern division of the State, a State average of 94 per cent.

## SWEET POTATOES.

The condition of sweet potatoes on August 1 is 94 per cent of normal, being 95 per cent in northern Illinois, 92 per cent in central Illinois and 94 per cent in southern Illinois.

## BUCKWHEAT.

A decrease of 3 per cent in the area of buckwheat, as compared with 1911, is reported.

The August 1 condition of buckwheat is 95 per cent of normal in northern Illinois, 86 per cent in central Illinois and 93 per cent in the southern division of the State.

## TURNIPS AND OTHER ROOT CROPS.

The area of turnips and other root crops is 4 per cent less than in 1911, and their August 1 condition is 93 per cent of normal.

## CASTOR BEANS.

Only two counties, Effingham and Hamilton, report on castor beans, where the August 1 condition is given as 100 per cent and 96 per cent respectively.

## TOBACCO.

No report is received from the northern division of the State on the condition of this crop.

In the central division the condition is 97 per cent of normal and in southern Illinois the August 1 condition is 90 per cent of normal.

## COW PEAS.

In northern Illinois the August 1 condition of cow peas is 92 per cent of normal, in central Illinois 83 per cent and in southern Illinois 85 per cent.

## FIELD BEANS.

The August 1 condition of field beans was 93 per cent of normal in northern Illinois and 91 per cent in the central and southern divisions of the State.

## FRUIT.

According to the reports of the correspondents made to this Department, apples promise a fair yield, but the peach crop was a total failure.

Plums, grapes and small fruit were plentiful.

## APPLES.

The August 1 condition of apples in northern Illinois is 40 per cent of normal, in central Illinois 56 per cent and in southern Illinois 69 per cent.

## PEACHES.

The condition of peaches, which is reported from but a few counties on August 1, is 22 per cent of normal in northern Illinois and 10 per cent in central and southern Illinois.

## PEARS.

The August 1 condition of pears is 48 per cent of normal in northern Illinois, 59 per cent in central Illinois and 71 per cent in the southern division of the State.

## PLUMS.

The condition of plums on August 1 was 70 per cent of normal in northern Illinois, 75 per cent in central Illinois and 79 per cent in southern Illinois.

## GRAPES.

The condition of grapes on August 1 was 92 per cent of normal in northern Illinois, 93 per cent in central Illinois and 83 per cent in southern Illinois, a State average of 89 per cent.

## BLACKBERRIES.

The blackberry crop this year was 81 per cent of an average yield in northern Illinois, 61 per cent in central Illinois and 48 per cent in southern Illinois.

## QUINCES.

But few counties report on the condition of quinces. Their condition on August 1 was 80 per cent of normal in northern Illinois, 63 per cent in central Illinois and 71 per cent in the southern division of the State.

## LIVE STOCK.

According to the reports of our correspondents, live stock is in a healthy condition with the exception of a few cases of distemper and pinkeye.

Hog cholera is reported from Bureau, Henry, Mercer, Peoria, Adams, Clark, Hancock, Pike, Scott, Clinton, Johnson, White and Williamson.

## DRAIN TILE.

So far as can be ascertained there are now 748,963,267 feet of drain tile in the State, which gives an average of 29 feet to each acre of cultivated land in Illinois.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season, and immediately after harvest, when the information as to condition and yield is most needed to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition or yield of the harvested crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or ten per cent, is recorded 110; a decrease of five per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but they do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for a term of years will be found to closely approximate the assessors' returns.

J. K. DICKIRSON,  
Secretary.

## NOTE.

The county clerks of the following counties, viz.: DuPage, Iroquois, Kankakee, Lee, and Whiteside, furnished the tabulated schedules of agricultural statistics of their counties in accordance with the law, and computations for those counties are based on their reports.

# ILLINOIS CROP REPORT

FOR

DECEMBER 1, 1912.

---

## SYNOPSIS OF THE REPORTS OF CORRESPONDENTS UPON THE ACREAGE AND YIELD OF CROPS, ETC.

ILLINOIS STATE BOARD OF AGRICULTURE,  
SPRINGFIELD, December, 1, 1912.

The information contained in this report as to the acreage of crops and number of head of live stock was obtained from the reports of assessors made to this Department as required by law.

The data in regard to yield per acre, price of crops and value of crops and live stock was obtained from crop correspondents, who number three hundred and fifty, and represent every section of the State.

The correspondents are, as a rule, representative farmers of extended experience, who are deeply interested in the accuracy of the reports made by the Department.

A large number of the correspondents have been reporting to this Department for the past thirty-five years, and their estimates, for a term of years, when compared with subsequent official returns made by assessors, have confirmed the superior judgment and conservative character of the reporters.

The State covers such an extended area from north to south (385 miles), and the conditions are so likely to be influenced by climate, soil, local storms, etc., that it has been found advisable to divide the same into three divisions in reporting the condition and yield of crops.

### WINTER GRAIN.

#### WHEAT.

A decrease of 14 per cent in the area seeded to wheat for the 1913 crop is reported.

Northern Illinois reports 37,045 acres, central Illinois 452,080 acres, and southern Illinois 518,305 acres, a total area of 1,007,430 acres.

The December 1 condition of the growing crop is excellent, being 94 per cent of normal in northern Illinois, 96 per cent in central Illinois, and 97 per cent in southern Illinois, a State average of 96 per cent.

#### RYE.

The area seeded to rye is reported as 35,700 acres, a decrease of 2 per cent as compared with last year.

Northern Illinois reports 29,793 acres, central Illinois 4,244 acres, and southern Illinois 1,663 acres.

The condition of this crop December 1 was 95 per cent of a seasonable average, being 96 per cent in northern Illinois, 97 per cent in central Illinois, and 93 per cent in the southern division of the State.

## CORN.

The area of the corn crop of 1912 was reported as 6,878,797 acres, an increase of 255,213 acres, as compared with the area of 1911.

Northern Illinois reported 2,954,435 acres, central Illinois 3,099,754 acres, and southern Illinois 824,608 acres.

The average yield per acre was 43 bushels in northern Illinois, 39 bushels in central Illinois, and 29 bushels in southern Illinois, a State average of 39 bushels. The total corn crop amounted to 270,806,079 bushels.

The ruling price of corn December 1. was 40 cents per bushel, and the total value of the crop amounted to \$108,827,882.

The quality of the grain was reported as 96 per cent of normal, being 95 per cent in northern Illinois, 96 per cent in central Illinois, and 97 per cent in the southern division of the State.

Chinch bugs, root lice and grub worms were in evidence and reports of the damage wrought by them were received from nearly every county of the State.

## CROP REPORT.

5

The area, yield and value of the corn crop of the State for the past fifty-three years is given in the following table:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel—cents.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## BROOM-CORN.

The area devoted to broom-corn is reported as 11,016 acres.

The total yield amounted to 5,578,000 pounds, the average yield per acre being 500 pounds.

The ruling price December 1 was \$98 per ton and the total value of the crop amounted to \$272,595.

The following table gives the area, yield and value of the broom-corn crop of Illinois since 1876:

Year.	Acreage.	Av. yield per acre— pounds.	Total yield— pounds.	Price per ton.	Value of crop.
1877.....	14,566	458	6,674,747	\$ 71 20	\$ 237,594
1878.....	18,258	614	11,218,168	49 50	277,645
1879.....	17,664	632	11,161,238	86 75	484,195

## CROP REPORT.

7

## SORGHUM.

There were 4,516 acres reported devoted to sorghum. The average yield per acre was 100 gallons and the total yield amounted to 453,434 gallons.

The ruling price December 1 was 60 cents per gallon, the total value of the product being \$267,457.

The following table gives the area, yield and value of the sorghum crops produced in the State since 1876:

Year.	Acreage.	Av. yield per acre— gallons.	Total number of gallons.	Price per gallon.	Value of crop
1877.....	19,335	63	1,237,164	\$0 42	\$515,409

## CROP REPORT.

## BUCKWHEAT.

An increase of several hundred acres is noted in the area of buckwheat, 1,704 acres being reported.

The average yield per acre was 19 bushels and the total yield 32,614 bushels.

The ruling price December 1 was 85 cents, the total value of the crop amounting to \$28,119.

The following table gives the area, yield and value of the buckwheat crop in this State for the past thirty-six years:

Year.	Acreage.	Av. yield. per acre— bushels.	Total number of bushels.	Price per bushel.	Value of crop.
1877.....	15,880	13	207,693	\$0 73	\$151,612

## TIMOTHY SEED.

There were 72,442 bushels of timothy seed reported produced in 1912.

The average price per bushel was \$1.95, and the total value of the crop at this price amounted to \$142,050.

The following table gives the amount and value of the crop in this State since and including 1877.

Year.	Bushels pro- duced.	Price. per bushel.	Value of crop.
1877.....	483,571	\$1 25	\$ 604,464

## CROP REPORT.

## CLOVER SEED.

The amount of clover seed produced in 1912 was reported as 36,916 bushels. The average price per bushel was \$9.30 and the total value of the crop amounted to \$342,912.

In the following table will be found the yield and value of the crop of clover seed for 1912, as compared with the thirty-five years preceding:

Year.	Bushels pro- duced.	Price per bushel.	Value of crop.
1877.....	64,686	\$ 4 80	\$310,493
1878.....	77,388	4 05	313,421

## CROP REPORT.

11

## HUNGARIAN AND MILLET SEED.

There were 23,915 bushels of Hungarian and millet seed produced in 1912.

The average price was 60 cents per bushel, making the total value of the crop \$14,792.

The following table gives the yield and value of this crop since 1876:

Year.	Bushels pro- duced.	Price. per bushel.	Value of crop.
1877.....	17,463	\$0 65	\$10,701
1878.....	26,787	55	14,733

## CROP REPORT.

## ALFALFA.

The area of this crop is reported by our correspondents as about 2,000 acres in northern Illinois, 3,000 in central Illinois and 2,000 in southern Illinois.

The price is reported as \$15 per ton in northern Illinois and \$14 in both the central and southern divisions of the State.

## BEANS.

There were 928 acres reported devoted to beans in 1912. The average yield per acre was 12 bushels and the total yield amounted to 11,261 bushels.

The ruling price December 1 was \$2.55 per bushel, and at this price the value of the crop amounted to \$31,885.

The following table gives the area, yield and value of the 1912 crop of beans, together with those of thirty-five years preceding:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	1,545	13	19,955	\$1 50	\$29,916
1878.....	1,669	16	18,627	1 35	25,146
1879.....	2,674	14	36,217	1 50	53,225

## CROP REPORT.

13

## CASTOR BEANS.

The area devoted to castor beans is reported as 5,819 acres and the average yield per acre 12 bushels, making the total yield 69,828 bushels.

The ruling price December 1 was \$1.00 per bushel and the total value of the crop amounted to \$69,828.

In the following table is given the area, yield and value of this crop since 1877:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushels.	Value of crop.
1877.....	4,503	3 <sup>1</sup> / <sub>4</sub>	17,538	\$1 10	\$ 18,512
1878.....	371	7	2,526	1 25	3,157

## TOBACCO.

The area in tobacco in 1912 was reported as 600 acres. The average yield per acre was 676 pounds and the total yield amounted to 405,750 pounds.

The total value of the crop at the ruling price of 10 cents per pound on December 1, was \$40,608.

The following table gives the area, yield and value of the crop in this State since 1876:

Year.	Acreage.	Av. yield per acre— pounds.	Total number of pounds.	Price per pound.	Value of crop.
1877.....	12,320	640	7,885,586	\$0 08	\$638,848

## PASTURES.

The area devoted to pastures in 1912 is reported as 3,593,523 acres.

The average value per acre for the season of 1912 was \$4.95 and the total value amounted to \$17,750,786.

The following table gives the area and value of pastures for thirty-six years past:

Year.	Acreage.	Value per acre.	Value of crop.
1877.....	4,367,603	\$3 38	\$14,764,112

## IRISH POTATOES.

The area devoted to Irish potatoes in 1912 was reported as 71,972 acres.

The average yield per acre was 100 bushels and the total yield amounted to 7,176,957 bushels.

The average price per bushel December 1 was 60 cents and the total value of the crop amounted to \$4,364,428.

The following table gives the area, yield and value of the Irish potato crops of the State since 1859:

Year.	Number of acres.	Average yield per acre.	Bushels produced.	Price per bushel.	Total value.	Value per acre.	Cost of production per acre.	Total cost of production.	Profit.	Loss.

## CROP REPORT.

17

## SWEET POTATOES.

The area devoted to sweet potatoes in 1912 was reported as 1,903 acres. The total yield amounted to 171,348 bushels, an average of 90 bushels per acre.

The average price was 90 cents per bushel and the total value of the crop at this price amounted to \$158,267.

The following table gives the area, yield and value of the sweet potato crop of the State for the past thirty-six years:

Year.	Acreage.	Av. yield per acre— bushels.	Yield in bushels.	Price per bushel.	Value of crop.
1877.....	2,355	63	148,270	\$0 85	\$126,092

## TURNIPS AND OTHER ROOT CROPS.

A decrease of 4 per cent is reported in the area of turnips and other root crops, 315 acres being reported.

The average value per acre is \$701.83, and the total value \$221,078.

The average yield of turnips per acre was 116 bushels.

The following table gives the acreage and value of turnips and other root crops grown in the State during the past thirty-six years:

Year.	Acreage.	Value per acre.	Value of crop.
1877.....	7,056	\$ 39 55	\$279,136
1878.....	3,775	40 85	154,140

## FRUIT.

## APPLES.

Northern Illinois reports the yield of apples 48 per cent as compared with 1911, central Illinois 57 per cent and southern Illinois 118 per cent.

The average price of apples per bushel was 85 cents.

## PEACHES.

There were practically no peaches produced in Illinois in 1912, the yield being but 28 per cent as compared with 1911.

The average price of peaches was reported as \$1.20 per bushel.

## PEARS.

Northern Illinois reports the yield of pears as 66 per cent of normal in northern Illinois, 84 per cent in central Illinois and 107 per cent in the southern division of the State.

The average price obtained for pears was reported as 95 cents per bushel.

## GRAPES.

There were 806,376 pounds of grapes produced in 1912. Of this amount 581,901 pounds were reported from the southern division of the State.

The average price of 2 cents per pound gives a total value of \$17,393.

The following table gives particulars concerning the grape crop of the State for the past thirty-six years:

Year.	Pounds produced.	Price per pound.	Value of crop.
1877.....	3,002,748	\$0 03	\$ 92,782

## WINE.

The area in vineyards this year was reported 4 per cent less than in 1911, or 708 acres.

There were 6,250 gallons of wine reported produced, being an average yield of 9 gallons.

The average price per gallon was 75 cents, and the total value amounted to \$4,743.

The following table gives the number of gallons of wine and the value thereof during the past thirty-six years:

Year.	Acreage.	Av. yield per acre— gallons.	Number of gallons. produced.	Price per gallon.	Value of crop.
1877.....	2,612	61	158,944	\$1 20	\$191,933

1909.....	244	119 06	29,051
1910.....	524	48 46	25,392
1911.....	334	103 19	34,467
1912.....	123	270 49	33,273

## STRAWBERRIES.

The value of the strawberry crop for 1912 was reported as \$67,646, of which \$27,035 was reported from the northern division, \$8,224 from the central division and \$32,387 from the southern division of the State.

## WATERMELONS.

The value of watermelons sold in 1912 in northern Illinois is reported as \$29,398, in central Illinois \$7,436, in southern Illinois \$9,778, a total value of \$46,612.

## OTHER CROPS NOT NAMED.

There are a number of crops raised in this State which are cultivated only in limited localities, and are not of sufficient importance to be tabulated alone, but are of considerable value to producers.

The value of these miscellaneous crops for 1912 was reported as \$119,383.

## BEES AND HONEY.

There were 244,829 pounds of honey produced in 1912.

The average price obtained was 17 cents per pound, making the total value \$41,744.

The total number of hives of bees reported for 1912 was 80,693.

The following table gives the amount and value of honey produced in this State during the past twenty-two years, together with the number of hives of bees:

Year.	Pounds produced.	Price per pound.	Value of product.	Number of hives of bees.
1891.....	821,678	\$0 14	\$112,934	120,252

## LIVE STOCK.

## HOGS.

According to the assessors' returns, there were 1,146,300 hogs in the State May 1, 1912.

At the equalized value of \$2.31 per head, they were worth \$2,647,953.

The number marketed was 951,425, or 83 per cent of the whole number.

The average weight of those marketed was 216 pounds, giving a total gross weight of 205,442,683 pounds. The average price per cwt. of hogs marketed was \$7.30, their value at this rate being \$15,005,254.

The supply of hogs on hand December 1 was 85 per cent and the average price per cwt. on that date \$7.15.

Hog cholera was reported from seventy counties of the State.

## CROP REPORT.

23

The following table gives the number of hogs assessed and marketed in 1912, as well as their weight and value, for the past fifty-seven years:

Year.	Assessors' Returns.		Estimated per cent marketed.	Number fat hogs marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value hogs marketed.

## BEEF CATTLE.

The number of cattle in the State May 1, 1912, according to assessors' returns was 1,258,293. At the equalized value of \$8.28 per head, they were worth \$10,418,666.

Twenty-three per cent of the whole, 289,405, were marketed during the year. The average weight was 1,013 pounds, making the total weight 310,050,754 pounds.

The average price of those sold prior to December 1 was \$6.70 per cwt., a total value of \$20,806,811.

The supply of beef cattle on hand December 1, 1912, was 83 per cent., and the average price per cwt. on that date \$6.45.

The following table gives the number, weight and value of the cattle marketed in the State since 1855:

Year.	Assessors' Returns.		Estimated per cent marketed.	Number beef cattle marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value beef cattle marketed.

## DAIRY COWS.

There were 520,053 dairy cows reported in Illinois in 1912. The average value per head was \$56, making the total value \$29,183,044.

Milk fever among cows is reported from Kane county.

The following table gives the number and value of the dairy cows kept in Illinois since 1878:

Year.	Number.	Av. value per head.	Total value.
1879.....	571,628	\$31 00	\$17,720,468

## HORSES.

The number of horses reported by assessors this year is 977,527 and their equalized value per head \$26.83, the total value amounting to \$26,227,049.

The number of colts reported foaled in 1911 was 85,470.

Distemper was reported from Champaign, Douglas, Edgar, Hancock, Logan, McDonough, Morgan, Jackson, Randolph and Williamson counties.

The following table gives the number of horses assessed in the State since 1855 and their equalized valuation, as well as the number of colts foaled each year since 1878:

Year.	Assessors' Returns.		Number colts foaled.

## SHEEP.

There were 356,822 sheep reported by assessors this year. Their equalized value is \$1.15 per head, making their total equalized value \$410,345.

## CROP REPORT.

27

Of the number assessed 22 per cent, or 78,494, were marketed.

Their total gross weight amounted to 7,851,421 pounds, an average weight of 100 pounds.

The average price received for those marketed prior to December 1 was \$4.55 per cwt., making their total value \$356,194.

The supply of sheep on hand December 1 was 85 per cent as compared with last year, and the average price per cwt. \$4.40.

The following table gives the number, weight and value of the sheep marketed in the State since 1855:

Year.	Assessors' Returns.		Estimated per cent marketed.	Number fat sheep marketed.	Av. gross weight per head.	Total gross weight.	Value per 100 lbs. gross.	Total value sheep marketed.

## CROP REPORT.

## WOOL.

There were 1,563,164 pounds of wool shorn in 1912.

The average price per pound was 21 cents, the total value of the wool clip amounting to \$338,639.

The following table gives the number of pounds shorn, the price per pound and the total value of the wool clip for the last thirty-six years:

Year.	Number pounds shorn.	Price per pound.	Total value.
1877.....	3,291,677	\$0 30	\$ 987,503
1878.....	2,891,087	25	722,752

## DAIRY PRODUCTS.

## MILK.

There were 96,909,485 gallons of milk sold in 1912.

The average price was 18 cents per gallon and the total value amounted to \$17,877,563.

The following table gives the amount, price and value of the milk sold in the State for the past thirty-six years:

Year.	Gallons sold.	Price per gallon.	Total value.
1877.....	17,124,506	\$0 11 <sup>1</sup> / <sub>2</sub>	\$ 1,912,236

1909.....	655,102	17	113,168
1910.....	678,927	18	123,458
1911.....	641,693	17	109,136
1912.....	619,220	19	120,394

Tables published elsewhere in this report give by counties the quantity and value of the dairy products of the State for 1912.

## POULTRY AND EGGS.

The value of the poultry sold in 1912 in northern Illinois was \$1,073,672, in central Illinois \$683,226 and in southern Illinois \$534,151, a total value of \$2,291,049.

The total value of eggs sold in 1912 amounted to \$2,916,667, of which \$1,196,060 is reported from northern Illinois, \$664,783 from central Illinois and \$1,055,824 from the southern division of the State.

## SUMMARY.

The following table gives in small space the value of the principal farm products and live stock of Illinois for the year 1912:

Corn .....	\$108,827,882
Winter wheat .....	4,663,333
Spring wheat .....	992,936
Oats .....	36,578,951
Rye .....	431,421
Barley .....	757,451
Buckwheat .....	28,119
Hay .....	28,830,089
Timothy seed .....	142,050
Clover seed .....	342,912
Hungarian and millet seed .....	14,792
Irish potatoes .....	4,364,428
Sweet potatoes .....	158,267
Turnips and other root crops .....	221,078
Broom-corn .....	272,595
Sorghum .....	267,457
Beans .....	31,885
Castor beans .....	69,828
Tobacco .....	40,608
Other crops not named .....	119,383
Grapes .....	17,393
Strawberries .....	64,646
Watermelons .....	46,612
Other fruits and berries .....	33,273
Wine .....	4,743
Honey .....	41,744
*Horses (equalized value) .....	26,227,049
*Beef cattle (equalized value) .....	10,418,666
Dairy cows .....	29,183,044
*Hogs (equalized value) .....	2,647,953
*Sheep (equalized value) .....	410,345
Wool .....	338,639
Milk sold .....	17,877,563
Cream sold .....	2,594,719
Butter sold .....	2,856,593
Cheese sold .....	120,394
Poultry sold .....	2,291,049
Eggs sold .....	2,916,667
Total .....	\$285,249,557

\*NOTE—The equalized value as fixed by the State Board of Equalization represents but one-fifth of the actual value.

## AGRICULTURAL STATISTICS.

The value of the crop statistics collected by this Department consists in their prompt and seasonable appearance during the growing season and immediately after harvest, when the information as to condition and yield is most needed, to enable the producer and the public to decide as to the extent of the supply and the market value of the crop. The official acreage of the crops, as reported by the assessors, is used as a basis for applying the estimates of crop correspondents as to the growing condition of yield of the harvested crop. In reporting conditions, 100 is used by correspondents to represent a fair, seasonable, average vitality or growth, unaffected by storms, insects or contingencies; an increase of one-tenth, or 10 per cent, is recorded 110; a decrease of 5 per cent is marked 95, etc. The correspondents of this Department are, as a rule, experienced farmers who have made the study of the condition and yield of crops their life work—conservative men, who realize the necessity for the work done by this Department, and assist it by their gratuitous reports.

It is not pretended that these reports will exactly coincide with the official assessors' returns, but do represent the condition or yield of the various crops, etc., at the dates given, as estimated by men experienced in this work, and their estimates for the term of years will be found to closely approximate the assessors' returns.

J. K. DICKIRSON, Secretary.

NOTE—The county clerks of the following counties, viz., DuPage, Iroquois, Kankakee, Lee, Livingston, Putnam, Whiteside, and Winnebago furnished the tabulated schedules of agricultural statistics of their counties in accordance with the law, and computations for these counties are based on their reports.

- 1888. C. H. Rankin, Payson, Star  
Route.
- 1904. A. R. Wallace, Jr., Camp Point.

## ALEXANDER COUNTY—

- 1907. G. W. Childress, Olive Branch.
- 1909. J. L. King, Elco.
- 1909. Herman Bunch, McClure.

## BOND COUNTY—

- 1885. W. H. Taylor, Greenville.
- 1898. L. E. Alexander, Reno.
- 1908. N. Cowen, Sorento.
- 1910. E. E. Mitchell, Greenville.

## BOONE COUNTY—

- 1899. O. S. Cohoon, Belvidere.
- 1909. Phil H. Sanford, Garden Prairie.
- 1911. C. W. Colton, 1519 Pearl st.,  
Belvidere.

## BROWN COUNTY—

- 1889. W. B. Rigg, Mt. Sterling.
- 1909. E. F. Byrns, Mt. Sterling, R. F.  
D.
- 1909. C. J. Davis, Timewell.
- 1909. J. M. Cronin, Mt. Sterling, R. F.  
D.

## BUREAU COUNTY—

- 1897. O. W. Mason, Buda.
- 1907. D. D. Draper, New Bedford.
- 1907. Frank J. Nye, Princeton.
- 1907. John Johnson, Walnut, R. F. D.  
No. 4.
- 1907. E. B. Anthony, Tiskilwa.

## CALHOUN COUNTY—

- 1881. M. A. Kamp, Kampsville.
- 1909. Wm. Franks, Batchtown.

## CARROLL COUNTY—

- 1909. Wm. Phillips, Mt. Carroll.
- 1909. Geo. Lang, Chadwick.

## CASS COUNTY—

- 1903. M. L. Crum, Virginia.

## CHAMPAIGN COUNTY—

- 1908. Dr. F. M. Conkey, Homer.
- 1885. W. E. Dawley, Seymour, R. F.  
D. No. 43.
- 1907. R. E. Chambers, Sadorus.
- 1907. Reuben Roughton, Rantoul.

## CHRISTIAN COUNTY—

- 1877. A. B. Herdman, Morrisville.
- 1878. O. S. Nash, Sharpsburg.
- 1904. J. Earl White, Morrisville.
- 1908. C. W. Ebert, Owaneco.
- 1909. E. Dixon, Pana.

## CLARK COUNTY—

- 1880. Jerry Ishler, Martinsville, R. R.  
No. 4.
- 1909. T. W. Richards, West York.

## CLAY COUNTY—

- 1904. Leslie F. Brissenden, Flora.
- 1904. Jno. T. Campbell, Louisville.

## CLINTON COUNTY—

- 1909. Jos. Heimann, Albers.
- 1901. Frank Bassler, Trenton.
- 1907. Theo. W. Timmerman, Breese.

## COLES COUNTY—

- 1905. John W. Black, Humboldt.
- 1905. James A. Walker, Lerna.
- 1905. E. E. Boyer, Ashmore.
- 1909. Sam Rardin, Rardin.

## COOK COUNTY—

- 1880. E. Wheeler, Arlington Heights.
- 1907. M. L. Staples, Palatine.
- 1907. John T. Cooper, Orland.
- 1907. C. Doctor, Orland.

## CRAWFORD COUNTY—

- 1882. William F. Wood, Oblong.
- 1897. W. M. Hart, Annapolis.
- 1900. Clinton Newlin, Hutsonville.

**CUMBERLAND COUNTY—**

- 1882. James M. Albin, Neoga.
- 1887. David B. Green, Toledo.
- 1897. J. L. Mattoon, Greenup.

**DE WITT COUNTY—**

- 1898. C. E. Robb, Clinton.
- 1912. J. T. Sprague, Clinton.
